## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I, claims 1-15, in the reply filed on December 1, 2004 is acknowledged. Applicant admitted to canceling claims 16-20.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-11, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Erdman (U.S. Patent No. 6,454,907). Erdman discloses in Figure 1 an apparatus and method for concentrating slurries by removing liquid in a single effect unit maintaining under vacuum comprising elements as recited in these claims including a vacuum vessel (12) maintained under vacuum by means of a vacuum system (14). The vacuum flash vessel (12) is adapted to contain a volume of slurry (22). A first recirculation pump (24) withdraws slurry from a slurry source receptacle (36) through a heat exchanger (28) for heating the incoming intermediate solid slurry to a temperature above 104° F, preferably 140° F prior to entering into the vacuum flash vessel (12). Erdman further discloses a homogenization device (52) for maintaining certain properties of the concentrated slurry.

***Allowable Subject Matter***

Claims 4, 5, 12, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
